

## [BC.NetBarcodeGenerator.Datamatrix](#)

### **Overview**

BC.NetBarcodeGenerator.Datamatrix is an advanced .NET library specially designed for .NET programmers to generate Data Matrix barcodes in various .NET (C#/VB.NET) projects, like .NET Windows Forms, ASP.NET Web, .NET Class Library, Console Application, etc. This .NET library can be easily embedded into your .NET projects for development.

BC.NetBarcodeGenerator.Datamatrix only supports Data Matrix barcode symbology generation for .NET applications. For all 2D and 1D barcodes generation, you should use our [BC.NetBarcodeGenerator.All SDK](#).

### **Limitation**

Trial version limitation: the watermark, "BC.Trial", will be displayed on created barcode image randomly.

### **Integration**

The only thing for integration is to add your project reference to BC.NetBarcodeGeneratorTrial.Datamatrix.dll.

### **How To**

The demo projects included (for ASP.NET and .NET Windows Forms) illustrate how to generate Data Matrix and output to String, Bitmap object, Stream object, Graphics object, and byte array. If you want to generate Data Matrix in .NET Windows Forms, ASP.NET Web Forms, and IIS applications, please see [this online guide](#).

### **Order**

See [license and price details online](#).
